

High quality manual tool for steel strap

Robust Italian design and manufacture

Perfect for strapping heavy cases and pallets

Suitable for varying strap widths

Quicker and easier to use than separate tensioner and sealer

Neat joint without the need for separate seals

Already established in industries as diverse as steel, cotton, distribution and contract packing, Itatools tools have a number of features that set them apart from other tools - all are easy to use, requiring the minimum physical effort by the operator, and carry such features as large push buttons, simple control panels with easy strap loading and adjustments for varying strap widths, where applicable.

The ITA30 is perfect for manually steel strapping heavy cases and pallets. This easy to use tool is suitable for 13, 16, and 19mm steel strap.

Key features

- **Precision built:** highest quality available, manufactured in Italy and with a 12 month warranty
- **Easy to use:** tensions and secures with a unique no-seal joint, in a single operation and without the need for steel clips
- **Easy changing of strap guide**
- **Adjustable:** easily adjusts for different widths - 13, 16 or 19mm at 0.5mm thickness

| | |
|------------------------|-------------------------------------------|
| Dimensions | 350(l) x 140(w) x 260(h) mm |
| Weight | 4.4kg |
| Max tension | 5500N dependant on strapping |
| Tensioning speed | 100mm/sec |
| Sealing | No seals |
| Average break strength | 80% of tensile break load of parent strap |
| Gear ratio | 1:18 |
| STRAP | |
| Type | Steel |
| Width | 13,16,19mm |
| Thickness | 0.45-0.7 |
